Shaun Lalani

438-926-8091 | shaunlal@usc.edu | shaun.lalani@mail.mcgill.ca | https://www.linkedin.com/in/shaun7036/

Education

University of Southern California — Los Angeles, CA
M. Sc in Analytics — *Jan. 2026 – Present*

McGill University — Montreal, QC
B. Eng in Electrical Engineering; Minor in Technological Entrepreneurship — *Sept. 2017 – May 2022*

Experience

Software Engineer — May 2023 – Nov. 2025
Multidev Technologies Inc. — *Montreal, QC*

- Led development of a multi-carrier, cloud-native shipping platform integrating Canada Post, FedEx, UPS, and USPS APIs. Delivered RESTful services and responsive UIs with Laravel, Vue.js, MySQL, and Inertia, supporting thousands of shipments monthly.
- Migrated infrastructure from Google Cloud Docker Swarm to AWS Lightsail, implementing containerized deployments and CI/CD pipelines with GitHub Actions. Reduced deployment time from hours to minutes and increased release frequency by 3x.
- Architected event-driven ingestion pipelines with Laravel observers, Redis queues, and SMTP alerts to synchronize MySQL with Interbase SQL client databases. Improved data reliability and reduced manual reconciliation by 90%.
- Implemented asynchronous background job processing and caching for shipping queries, cutting API response latency and improving shipping workflow performance by 70%.
- Developed carrier integration libraries: a Composer-packaged UPS PHP library (via FastAPI ingestion of OpenAPI specs) and a FedEx REST API wrapper, integrated into the shipping platform with GitHub Deploy pipelines for secure package delivery.
- Integrated CRM and POS systems with the shipping platform, eliminating redundant data entry and reducing order-processing time for clients by 30%.
- Built a package manager application for microservices and binaries using Chocolatey and ProGet, automating deployments via PowerShell and APIs. Reduced infrastructure storage costs and streamlined remote provisioning.
- Deployed centralized log observability stack (Grafana, Loki, Alloy) to aggregate logs across applications and build analytics. Reduced mean time to resolution (MTTR) for incidents by 35% and improved proactive monitoring.

Junior Software Engineer — Jan 2023 – May 2023
Multidev Technologies Inc. — *Montreal, QC*

- Built Python and Object Pascal GUI tools to extract, transform, and visualize Interbase RDBMS data using Pandas/Seaborn, enabling per-user auditing and saving 5+ hours of manual reporting per week.
- Optimized ORM queries, SQL performance, and API routing across Laravel services via the implementation of indexing and transaction handling. Improved database query efficiency by 30% and reduced API response times.
- Wrote PHPUnit unit tests and validated endpoints via Postman, raising automated test coverage by 25% and reducing regression bugs.
- Refactored legacy modules and enhanced internal documentation, improving maintainability and on boarding speed for new developers.
- Developed a client on-boarding application using Python, Jinja2, and Pandas to translate client-side configuration setups into Laravel seeder files. Improved on-boarding efficiency by 80% by reducing manual setup time and enabling faster adoption of the web platform.

Technical Analyst / QA Analyst — Jun 2022 – Dec 2022
Multidev Technologies Inc. — *Montreal, QC*

- Automated daily workflows with Python scripts to support multi-platform logins and optimized backup management (Interbase, MySQL, Firebird), improving support efficiency and reducing manual effort by 30%.
- Deployed ELK (Elasticsearch, Logstash, Kibana) stack for centralized log analysis, cutting client-side troubleshooting time and improving support team productivity.

Selected Projects

Electromagnetic Tweezer Apparatus | *Python, MATLAB, OpenCV, Pandas* September 2021 – April 2022

- Worked on using image sequencing, image processing and computer vision techniques on MATLAB and Python to build a particle tracking system to implement a control scheme for tweezer manipulation.
- Used tools like Gantt chart for resource allocation and timeline management while maintaining project reports through the means of LaTex documentation.

Business Development for VVector Bio | *Youtrack, Latex* January 2020 – April 2020

- Worked with McGill Engine startup VVector Bio in creating a business plan and venture capital pitch. Conducted research on financial, marketing, and competition data to formulate a business plan and VC pitch for the startup.
- Conducted in-depth market research to identify market share, industry pain points, product penetration opportunities. Researched competition and created an operating plan and budget for the start-up. Developed a marketing plan to best advertise the product in the future and completed a cost-benefit analysis.
- Conducted surveys, connected with stakeholders, and parsed through bio-tech research to identify industry pain points and produce product cost-benefit analysis.

.

Extra Curriculars

ISE Analytics Student Association Jan 2026 – Present
Member *Los Angeles, CA*

Sports Business Association Jan 2026 – Present
Analytics Division *Los Angeles, CA*

USC Fabric Arts Club Jan 2026 – Present
Chair *Los Angeles, CA*

Trojan Sports Research Lab Jan 2026 – Present
Research Assistant *Los Angeles, CA*

Tech Cafe Volunteer Jan 2022 – May 2022
The Yellow Door *Montreal, Quebec*

Editor-in-Chief / Copy Editor September 2021 – May 2022
The Plumber's Faucet *Montreal, Quebec*

Editor / Staff Writer September 2019 – May 2020
The Plumber's Ledger *Montreal, Quebec*

Staff Sports Writer / Contributor September 2018 – September 2020
The McGill Tribune *Montreal, Quebec*

Student Council President Aug 2016 – May 2017
Aga Khan Academy *Hyderabad, India*

Technical Skills

Languages: PHP, Python, Java, JavaScript, SQL (MySQL, MSSQL, Postgres, Interbase, Firebird), Object Pascal, Rust, Bash, PowerShell,
Frameworks: Laravel, Vue.js, React, Node.js, Express.js, Tailwind, PrimeVue
Cloud & DevOps: AWS, Google Cloud, Docker, GitHub Actions, Nginx, Apache2, ProGet, Chocolatey
Monitoring & Observability: Grafana, Loki, Alloy, ELK (Elasticsearch, Logstash, Kibana)
Libraries: Pandas, NumPy, Seaborn, Selenium, OpenCV
Spoken: English (native), French (fluent), Hindi (native)
